

# Company profile

Balda AG with its Balda Medical division is a leading OEM partner of the global healthcare industry for development, industrialization and production of complex plastic systems.

Through our comprehensive manufacturing and service portfolio we build our technological leadership in applied processes and quality levels achieved, essential to meet the demands of today's and future market.

Our production capabilities are an integral part of our systematic development and manufacturing processes and the basis for product development for our current and new customers.

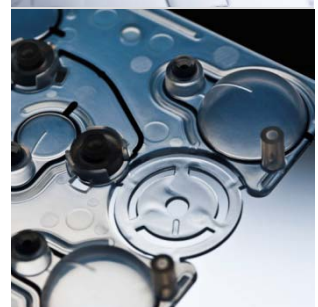

We produce inhalers, drug delivery systems, handheld devices and diagnostic devices and disposables as well as complete kits and functional packaging using the most advanced equipment for fully and semi-automatic production-lines.

## Manufacturing & Service Portfolio
